

Dan Edens

(469)-636-7704

DanEdens31@gmail.com

Self Sufficient and Driven Software Engineer with a focus on Process Automation and Data Collection. I Offer a wide range of experience in DevOps Project management, Data collection, Risk mitigation, and Compliance documentation.

Hands-on field experience spent ensuring data flow from sensors and assisting clients with data utilization, yielded a strong practical sense for user-centred Design.

Experienced Operating Independently, and worked as a stand-alone remote branch for 3.5 years.

Incomprehensive list of tools I have delivered products using:

- Python, NodeJS, Javascript, Java, Visual Basic, HTML, REST, PHP, SQL, MQTT, and a variety of APIs
- DevOps CI/CD, Containerization, and Documentation generation
- Cloud platforms including Azure, Gitlab, AWS, and self-hosted services

Project Portfolio

Work History

Geo-Instruments

06/2018 - Present (07/2022)

Video detailing what we do at Geo-instruments

Geo-technical Monitoring specialist responsible for managing projects including Data collection, Web development, Risk mitigation and Compliance documentation for a variety of industries.

- Managed multiple projects with job sites across the Midwest.
- Built backends for data collection and set up project Websites using Python, Javascript, NodeJS, MQTT, SQL, and PHP.
- Developed tools to improve efficiency and Issue response time.
- Experience with Data acquisition tools such as Solar controllers, Modems, Sensors, and dataloggers.

In addition to this Project management role, I heavily engaged myself in our Apps and Software departments.

Some of these duties include:

1. Setting up Customer websites
 1. Automating data collection of field sensors
 1. Alert Investigation
 1. Setting up and maintaining reports to clients
-

Chili's Grill and Bar

4570 TX-121, Lewisville, TX 75056 - (214) 494-6341
